

Post-conference programme

RAMIRAN 2015 conference from 08.-10.09.2015:

Agriculture produces bioresources for food and increasingly also for material and energy provision. The majority of agro-products are used in urban areas where they are connected with waste and wastewater generation. RAMIRAN 2015 is focusing on closing the loop linking rural production and urban consumption systems and on the development of more sustainable solutions for the handling of residues.

Thematic areas:

- Fertilizers from residues;
- Soils for the future,
- Advances in emission prevention
- The bioresource challenge,
- Agro-products for the biobased economy,
- Smart concepts for rural development,
- Towards zero waste settlements,
- Rural-urban sustainability cases studies world wide

Post-conference on 11.09.2015:

The conference is a meeting place of scientists and practitioners covering the previously listed topics. Some of the participants may wish to connect the conference with other activities, such as:

- Project meetings
- Planning project proposals
- Meeting of member of international organisations
- Working group meetings
- Presentations to attract new members for the own organization
- And more

For that purpose we have reserved rooms for your meetings or presentations - providing the platform for your event:

In order you are interested to carry out a meeting, please contact for more information, conditions and reservation:

Ina Körner (conference chair; i.koerner@tuhh.de)

Gerlinde Löbkens (local organizer (ramiran2015@tutech.de))
